Our Background

Jim Schnabel, circa 1956

Founded 1956 in the Washington, DC area

300+ people in 20 offices

Employee-owned

Specialize in geo-engineering, dam and levee engineering, and underground services

Serve clients in both private and public sectors

Work domestically and internationally

2016 revenue >$57M

We improve lives by engineering solutions and managing risk on complex infrastructure challenges.

20 U.S. offices (and growing) in the following states/districts

Georgia
Maryland
New Jersey
New York
North Carolina
Pennsylvania
South Carolina
Tennessee
Texas
Virginia
Washington
Washington, DC

Our People

We are specialists in geo-engineering, dams and water resources. Schnabel is the sum of our people—multiplied.

Designers

Engineers

- Geotechnical
- Civil
- Hydraulic
- Structural
- Geological
- Risk
- Instrumentation
- Seismic
- Mechanical
- Mining

Environmental Professionals

Geologists

Geophysicists

Hydrologists

- Surface Water
- Groundwater

Specification Writers

Services Offered

Geotechnical Engineering

Geostructural Engineering

Geosciences/Geophysics

Dam Engineering

Construction Services

Risk Engineering

Sustainable Geotechnics

Environmental Engineering

Our Markets

Commercial and Industrial

Dams and Levees

Federal, Municipal and Local Governments

Institutional: Healthcare and Higher Ed

International

Power and Energy

Transportation

Tunnels and Underground Structures

Water and Wastewater Infrastructure
