Stantec

Fort Belvoir MS4 Program Database & Inspections

Assists Ft. Belvoir in meeting its Chesapeake Bay TMDL and MS4 permit compliance.

- Field surveys and inspections of over 300 stormwater Best Management Practices (BMPs)
- Created a Geospatial Database linked to their GIS system for asset management
- General Plan for Stormwater Management BMP Inspection and Maintenance
- Standardized forms for tracking all inspections and maintenance
- Prepared corrective action plans and stormwater retrofit recommendations
- Prioritized work needed to improve or restore functionality of existing stormwater infrastructure and receiving stream
- Developed a training and certification program to be deployed over Ft. Belvoir's web-based training portal

Stantec

Fort Eustis
Joint Land Use Study (JLUS)

Joint Base Langley-Eustis (JBLE) – Newport News – James City County

Some of the major issues Fort Eustis and the surrounding communities are facing include:

- Increased regional growth leading to stressed infrastructure and transportation systems;
- Sea level rise and flooding in the community and at Fort Eustis; and
- Waterway management and access conflicts from the increased number of recreational and commercial boats frequenting the waterways along the James River.
