Happy Fall, Post Members.

This summer we had a lot of golf and outreach to get our year started.

We also held a great August monthly meeting with Northeastern professor Dr. Stephen Flynn as speaker. He gave attendees a riveting presentation on resiliency at the MEMA bunker in Framingham.

October’s monthly meeting will be held at Waxy O’Connor’s Restaurant in Lexington, MA, with Mr. Joseph F. Greger, Small Business Program Manager, DCAA. Training will be held in the morning, followed by lunch and a talk on DCAA Overview and Auditing. Please join us for both the meeting and the training if you are able.

October will be a busy month, as we also have a golf event on October 9th. We hope that many of you will join us for a great fall day of golf and networking at Charter Oak Country Club in Hudson.

As we start this year’s events, we want to thank all sustaining members who contribute so much time and effort throughout the year.

We are always ready to welcome new members; there are opportunities to work on and lead committees and help with a wide range of activities throughout the year. If you’d like to join a committee, please reach out to me or one of the committee chairs.

The Post had a great August meeting last month. Thirty-five members and friends of the SAME Boston Post kicked-off the Post’s 2018/2019 season by joining members of the Massachusetts Emergency Management Agency (MEMA) on Thursday August 16, 2018 at the ME-MA Bunker in Framingham, MA to take a tour of the Bunker facility and listen to a very insightful presentation on Infrastructure Resiliency. MEMA Public Information Officer Christopher Besse gave the group a tour of the underground bunker facility, providing information on the history of the Bunker’s construction, an overview of MEMA’s Operations and insight into the procedures and process in place during Emergency Response activations. Lunch was served and Post Committee reports were provided. Following lunch, attendees were provided an extremely insightful and eye-opening discussion of Infrastructure Resiliency by nationally renowned Dr. Steven Flynn, Prof of Political Science and Founder of the Global Resilience Institute at Northeastern University.
Dr. Flynn, a former active duty commissioned officer in the U.S. Coast Guard for 20 years, including two tours as commanding officer at sea, leads the major university-wide research initiative to inform and advance societal resilience in the face of growing human-made and naturally-occurring turbulence. He has previously served as President of the Center for National Policy and spent a decade as a senior fellow for National Security Studies at the Council on Foreign Relations. In 2008 he served as the lead homeland security policy adviser for the Presidential Transition Team for President Barack Obama.

Dr. Flynn’s presentation discussed the need for an interdisciplinary approach to bolster resilience in an interdependent world. He highlighted risks posed by the increasingly connected nature of modern society, and the vulnerability of interdependent networks and systems to cascading failures, where shocks from one event, such as a natural disaster or disease outbreak, will be felt across sectors, or even across the globe. Superstorm Sandy served as a prime example. Dr. Flynn pointed out that the failure of the transportation system caused the closure of the stock market, prevented sick patients from accessing medical services like dialysis, and undermined recovery efforts. He also noted that the effort to increase resilience against shocks requires an interdisciplinary approach.

He stressed the need for engineers, economists, scientists, research, government and industry business leaders to work together to reach solutions to design incentives to help scale and sustain resilient practices. The presentation was fascinating and many videos of Dr. Flynn speaking can be found on YouTube.

Special Thanks go to Katy Bellemare, Executive Assistant, Marybeth Groff, MEMA Chief of Staff, Maggie Fiola, Administrative Assistant, Christopher Besse, Public Information Officer for their warm hospitality and support in coordinating this wonderful event. We look forward to seeing you at upcoming Post events later this Fall.
Tuesday October 9th, 2018

Charter Oak Country Club
394 Chestnut Street
Hudson, MA 01749

Registration: 8:30 AM
Shotgun Start: 10:00 AM

Come out for a fun day of golf and networking to help support the mission of the Society of American Military Engineers and the Boston Post

***SAME leads collaborative efforts to identify and resolve national security infrastructure related challenges***
The SAME Boston Post is hosting a **Networking Night at UMass Amherst** on Tuesday, October 16th at 6:00 pm at the Conference Center (Room 174-176).

After you and your colleagues attend the 34th Annual International Conference on Soils, Sediments, Water, and Energy at the University, please stop by Tuesday evening and spend some time meeting the students. It is a great opportunity for members of the UMass Amherst SAME Student Chapter to meet and network with professionals from the Boston Post in an informal setting. Every year the event is well-received, and we hope to continue our successes this year! A light dinner and refreshments will be served, and everyone is welcome!

Please contact Debra Beck (beckdf@cdmsmith.com) with any questions.

October 23rd, 2018
SAME SMALL BUSINESS EVENT
Training and Luncheon
Sponsored by SAME Boston Post Small Business Committee

Defense Contract Estimating & Auditing
10am-12pm, Registration 9:30am
Mr. Joseph F. Greger
Small Business Program Manager, DCAA

Morning Event: Small Business training. Mr. Greger will present an overview of DCAA and discuss FAR Part 15, Table 15-2 and DFARs 252.215-7009. He will provide proposal adequacy requirements for costs: Direct Labor, Materials, Subcontracts, Other Direct Costs, and Indirect Rates. This presentation will tap into his small business expertise including such areas as historical data considerations, FAR Part 31 cost principles, common proposal deficiencies, and resources available to assist with proposal development.

DCAA Overview and Auditing Process
12:30pm-2:00pm, Registration 12pm
Luncheon Event: Mr. Greger will present an overview of DCAA including its responsibilities and duties. Discussion will include the types of DCAA audits that can be performed at phases of a defense contract, and DCAA resources and tools that are available for contractor compliance.

Waxy O’Connor’s Restaurant, 94 Hartwell Ave, Lexington, MA
Morning Training $20/person
Luncheon $50/person ($40 for Government/Seniors/Young Members)
Register for one or both events at: https://same.org/boston
Undergraduate Certificates at Wentworth Institute of Technology

New! Undergraduate Certificates at Wentworth Institute of Technology.

Gain competencies, earn credits, in six months!

The College of Professional and Continuing Education at Wentworth Institute of Technology now offers three credit-bearing certificates that will help you go further.

- Facilities Management;
- Managing Construction Projects; or
- Project Management (online)

Gain competencies in communications, finance, leadership and project management plus earn 20 credits towards a bachelor’s degree from Wentworth, in just six months. Whether you want to advance your career, or explore something new, an Undergraduate Certificate from Wentworth Institute of Technology can help you achieve your goals.

Financial aid available.
Thanks to all our Members and Sustaining Members for their enduring support of the Boston Post, whose goal is dedicated support to our nation and the advancement of the science of military engineering. The Post strives to maintain and build on the proud and successful traditions and heritage that our nation’s military engineering community has established by conducting various programs and activities that contribute to this purpose.

The Boston Post helps the engineering and environmental professions, the construction industry, and the many federal and state agencies achieve their respective goals. The Post accomplishes this help by promoting the natural linkage between the civilian and military engineering, environmental, and construction industries for their mutual benefit. The Post additionally accomplishes this aim through supporting education in engineering and the environmental sciences through its scholarship program, its tutoring and mentoring programs, and by continuing education of its professional membership.
