North Fort Bend Water Authority

SAME/TPWA CIP Briefing
October 17, 2018

www.nfbwa.com
The North Fort Bend Water Authority (Authority) was created to facilitate compliance with the Fort Bend Subsidence District’s (Subsidence District) groundwater withdrawal reduction mandates.

The Authority’s mission is to provide a long-term supply of water from sources other than groundwater (e.g., surface water) to the water users within its boundaries.
Authority Water Supply Projects

Current Projects:
- Partner in the Northeast Water Purification Plant (NEWPP) Expansion
- Partner in the Surface Water Supply Project
- Partner in the Luce Bayou Inter-Basin Transfer Project (LBITP)

Future Projects:
- 2025 Water Lines to connect more water plants with surface water supply
- Allens Creek Reservoir (if needed)
