Cancellation Policy
Fall Protection Group Cancellation Policy

▼ We strongly recommend registrants arrive 15 minutes prior to course commencement to sign in.
▼ Students who arrive 30 or more minutes after the course has begun will not be permitted to participate and will forfeit their course fee.
▼ Students who fail to arrive on the date of their course will forfeit the course fee.
▼ Registrants will forfeit the full course fee if cancellation notice or date transfer requests are received fewer than 15 business days prior to the scheduled course date.
▼ The pace of the course is brisk, thus, being present for all instruction is essential. Participants who, for any reason, miss more than 15 minutes of instructional time cannot be caught up to the rest of the class, will forfeit their course fee, and be asked to re-register for a later course date. Registrants who must attend to urgent matters and miss fewer than 15 minutes of instruction can be caught up during a break.
▼ A company may substitute a registrant up to 7 Business days prior to the course date without penalty.
▼ NVL does not issue “transfer credits.” Attendees who wish to re-register for a later course date for any of the aforementioned reasons (absenteeism, tardiness, failing to successfully pass the course, being asked to leave a course for any reason, or cancelling with fewer than 5 business days’ notice) will be required to pay the full course fee for any subsequent course dates.
▼ NVL reserves the right to cancel any scheduled courses five business days in advance of course commencement. Fall Protection Group will notify registered individuals as soon as the class has been canceled.
This training provides a comprehensive look at all regulations outlined in the EM 385-1-1 manual. Completing this course will support worker compliance with U.S. Army Corps of Engineers Contractor Safety and Health Requirements. EM 385-1-1 compliance is required by all contractors working on military contracts and projects. There will be a pass/fail exam at the end of the course in order to qualify for the certificate of completion.

**Topics Discussed**

- Overview of fall standards for OSHA and EM-385
- Review of requirements for OSHA and EM-385 fall protection competent person
- Fall hazard recognition
- Fall hazard elimination and control methods
- Hierarchy of fall prevention methods
- Applicable fall protection regulations
- Fall hazard surveys and fall protection procedures
- The responsibilities of designated persons under this standard
- Inspection of equipment components and systems including hands-on training
- Fall protection rescue procedures
- The selection and use of anchorages
- Fall protection on aerial lifts, scaffolds and ladders
- Preparation of fall protection plan documents
- Hands on exercises for use of fall protection equipment, rescues
- Storage and care of equipment

**Course Description**

This training is designed to provide the attendee with the knowledge needed to meeting the OSHA and ANSI requirements for a fall protection competent person. This EM385-specific training also provides the specific training and information needed for compliance with the latest EM385 standards.

This course includes both classroom training following NVL’s course materials supplemented with videos and power point presentations. A hands-on component is also included to meet the requirements of the newest EM385/OSHA regulations and to give the attendees the opportunity to practice and reinforce the skills learned in the classroom. Attendees will learn how to apply knowledge and equipment discussed during the course to practical situations they might encounter in the field. The course is a pass/fail program and will include both hands-on components as well as a final written exam.

**Class requirements/Disclaimers**

- ANSI approved harness with trauma suspension straps
- Disclaimer regarding health issues during hands on activities
