On behalf of the Louisiana Post, I want to extend our sincere thanks and appreciation to Colonel Richard Hansen for his outstanding service as the New Orleans District’s 62nd Commander and District Engineer, and for his exceptional service as the SAME Louisiana Post President for the past three years. It has been an honor and a pleasure to have served on the Post Board of Directors with Colonel Hansen, and I am honored to follow him as your new Post President. We wish Colonel Hansen and his family all the best in his future endeavors, and we pray he has a safe tour of duty in Afghanistan.

At this time, I would like to welcome the New Orleans District’s 63rd Commander and District Engineer, Colonel Michael Clancy, P.E. Colonel Clancy hails from City Island, The Bronx, New York and is married to Lt. Col. (Ret.) Hailey Clancy, who teaches chemistry at Loyola University in New Orleans. Colonel Clancy has a BS in Engineering Management from the U.S. Military Academy-West Point, an MS in Engineering Management from Missouri University of Science and Technology, and an MS in Civil Engineering from Colombia University. Colonel Clancy is also our incoming Senior Vice President for the Louisiana Post. We look forward to working with Colonel Clancy in the coming months and years.

Also of note, the Louisiana Post is proud to announce that the Young Member Committee has the SAME student chapter up and running at the University of New Orleans. Kudos to Josh Cohen and the Young Member Committee, who put in a lot of time and effort to get this Student Chapter organized and operating.

Regards,
Anthony F. Goodgion
HOST SUSTAINING MEMBER INFORMATION

We still have some luncheon meetings available for Sustaining Members to host. Hosting our monthly meetings is a great opportunity to put your firm in the limelight and showcase your firm’s experience and abilities. If your firm is interested in hosting one of these meetings, please contact Charlie Settoon at (504) 889-0182.

We would like to thank all the Sustaining Member Firms who have hosted a monthly meeting in the past. If it has been a while since your firm hosted a meeting, you are welcome to host another meeting. Let’s continue to show our support for the Louisiana Post through this great professional opportunity.

Mr. Regan Brown is the Assistant Director of Navigation and Environmental Affairs at the Port of Lake Charles. He received a B.S. in Environmental Science from McNeese State University and began his career in the environmental consulting business. While employed as an environmental scientist with Arabie Environmental Solutions, Inc., Mr. Brown received his M.S. in Environmental Science. During his twelve years as a consultant, he worked on numerous environmental projects involving air, water, and waste. However, Mr. Brown specialized in land acquisition and development issues, such as Phase I and II Assessments, risk evaluation, wetland delineations and Section 404/10 permitting. By the time Mr. Brown left the consulting business, he was managing 10-20 wetland permitting projects and supervising several employees.

Mr. Brown continued his career with Entergy Corporation-a private electric utility with assets in Louisiana, Texas, Mississippi, and Arkansas. As project manager with Entergy, he managed 4 to 8 transmission capital projects simultaneously with budgets ranging from $250,000 to $75+ million. Later, Mr. Brown transferred to the environmental management department where he continued to manage environmental issues on capital construction projects across Texas and Southwest Louisiana.

Mr. Brown is relatively new to the Port of Lake Charles where he assists the Director of Navigation with Calcasieu Ship Channel issues. He also assists the Director of Engineering with day to day environmental issues at the Port’s Bulk Terminals. His knowledge of environmental rules and regulations, land acquisition/development, and permitting issues has been applied to various projects as the Port of Lake Charles expands.
