Data Sight
Speaker: Mr. Jason R. Kack PLS, 107 Airman

DataSight

Presenter: As the Vice President of Project Delivery, Mr. Jason Kack is responsible for development and management of geospatial data processing teams. He is a Professional Land Surveyor with 25-year career implementing technology and related work flows to produce added value baseline data for a broad spectrum of projects. This presentation will provide an overview of current UAS (drone) applications. Topics covered include FAA regulations, commercial grade critical infrastructure UAS (drones), sensor capabilities and deliverables.
Helix Design Group, through its successful completion of an exceptional variety of assignments, offer Federal agencies a unique ability to support any project, from initial planning and funding applications to full design and construction support. Federal projects have not only become specialties within the firm, but also represent one of Helix’ major Client segments. Specific assignments have included:

- Master Planning
- Preparation of Federal Funding Requests (DD1391’s)
- Preparation of Feasibility Studies
- Preparation of Project Definition Reports (PDR’s)
- Preparation of Design/Build Requests For Proposal (RFP’s)
- Full Project Designs as Member of D/B Teams
- Full Design for Design/Bid/Build Procurements
- Comprehensive Interior Design
- Title II Services

Helix Design Group offers a broad range experience working on projects in other market segments as well. Contact us to learn more.

Your firm can appear in this space! If you would like to become a Sustaining Member of the Mount Tacoma Post, please contact Dave Newkirk at 253.606.1047
The mission of the Society of American Military engineers is “To promote and facilitate engineering support for national security by developing and enhancing relationships and competencies among uniformed services, public and private sector engineers, and related professionals.” One key avenue for the society to accomplish that mission is to make the expertise and capabilities of our members readily available to government agencies responsible for response to natural and manmade disasters. To accomplish that end the Mt. Tacoma and Seattle Posts established an Emergency Preparedness and Infrastructure Resilience (EO&IR) committee.

Historically, large-scale response to emergencies has been a partnership between government and private industry. The full support potential of the A/E and construction industry in the Puget Sound area can only be reached when the Government’s emergency managers and the executives of the member companies are aware of each other’s requirements and capabilities.

EP&IR committee members reach out to local, State and Federal agencies to inform them of the capabilities of our sustaining members. The committee has prepared a tri-fold leaflet explaining the mission and purpose of SAME emergency preparedness. The leaflet contains a listing of member firms who have indicated a readiness to respond to emergencies and disasters.

The committee needs to know if you or your firm will be available to respond with your resources in the event of a disaster. The key questions are: (1) what capabilities do you offer to emergency managers in the early stages of disaster response and (2) how responsive can you be given that a regional event, such as an earthquake, may damage your facilities including employees’ homes. Any member firm that would like to participate as a listed available resource to government emergency management agencies should contact the Mt. Tacoma or Seattle Post Co-Chair of the Emergency Preparedness and Infrastructure Resilience Committee. In addition, any individual member who would like to work with the Committee is encouraged to contact one of the same committee co-chairs.

If you have any questions about this effort please contact: John Haddick EP&IR Committee Co-Chairman at jehaddick@msn.com / (253) 565-1223 or Mike Moran EP&IR Co-Chair at michael.moran248@gmail.com / (253) 232-3087.
