Advanced Geohazard Solutions
Speaker: Tim Shevlin, PG, Geobrugg

Program: This month’s presentation will provide advanced Geohazard Solutions for mitigating natural hazards including rockfall, unstable slopes, landslides, debris flow, and snow avalanches. Geobrugg North America introduces their product lines and capabilities by providing solutions directly to contractors, consultants, or the end user for protecting facilities from railways, highways, hydro facilities, open pit mines as well as ground support in underground mining. These solutions are cost-effective and efficient alternatives for solving difficult Geohazard problems compared to traditional methods.

Presenter: Tim Shevlin is an Engineering Geologist with 15 years of experience performing geotechnical and geologic investigations. Mr. Shevlin has a Bachelor of Science in Environmental Science from Allegheny College and a Master of Science in Geology from Kent State University. He is also a licensed Professional Geologist in the State of Pennsylvania and Oregon.

Prior to joining the Geobrugg team Tim worked on both public and private sector projects for nationally-known engineering consulting firms performing geotechnical investigations and designs. He has experience working on commercial development projects, water resource projects, mine subsidence problems, groundwater contamination studies, and transportation/railroad projects.

Tim is Geobrugg’s Regional Manager for Northwest USA & Hawaii and the US Technical Product Sales Manager; he works out of the Salem, Oregon.
Support our Soldiers in Service.

Extended deployments and casualties.
Support to families as they cope with life for our country.
Memorial, materials and social support and military installations.
Memorial services in both hometowns.
Flower arrangements provided.

Financial support in times of need.

Support our troops today!

Your firm can appear in this space! If you would like to become a Sustaining Member of the Mount Tacoma Post, please contact Dave Newkirk at 253.606.1047
The mission of the Society of American Military engineers is “To promote and facilitate engineering support for national security by developing and enhancing relationships and competencies among uniformed services, public and private sector engineers, and related professionals.” One key avenue for the society to accomplish that mission is to make the expertise and capabilities of our members readily available to government agencies responsible for response to natural and manmade disasters. To accomplish that end the Mt. Tacoma and Seattle Posts established an Emergency Preparedness and Infrastructure Resilience (EO&IR) committee.

Historically, large-scale response to emergencies has been a partnership between government and private industry. The full support potential of the A/E and construction industry in the Puget Sound area can only be reached when the Government’s emergency managers and the executives of the member companies are aware of each other’s requirements and capabilities.

EP&IR committee members reach out to local, State and Federal agencies to inform them of the capabilities of our sustaining members. The committee has prepared a tri-fold leaflet explaining the mission and purpose of SAME emergency preparedness. The leaflet contains a listing of member firms who have indicated a readiness to respond to emergencies and disasters.

The committee needs to know if you or your firm will be available to respond with your resources in the event of a disaster. The key questions are: (1) what capabilities do you offer to emergency managers in the early stages of disaster response and (2) how responsive can you be given that a regional event, such as an earthquake, may damage your facilities including employees’ homes. Any member firm that would like to participate as a listed available resource to government emergency management agencies should contact the Mt. Tacoma or Seattle Post Co-Chair of the Emergency Preparedness and Infrastructure Resilience Committee. In addition, any individual member who would like to work with the Committee is encouraged to contact one of the same committee co-chairs.

If you have any questions about this effort please contact: John Haddick EP&IR Committee Co-Chairman at jehaddick@msn.com / (253) 565-1223 or Mike Moran EP&IR Co-Chair at michael.moran248@gmail.com / (253) 232-3087.
