SAME PANEL DISCUSSION
Restoring American Power

Sharon Smith, Capital Improvements Core, Acquisition Program Manager

June 15, 2017
Challenges

• **Technology**
  – Ability to run design programs, BIM & Web-based Construction
    • Firewall issues w/NMCI and Cloud space
  – **Cyber Security**
    • Criteria

• **Staffing**
  – Recovering from hiring freeze
  – Labor pool is limited - finding engineers
  – Risk management with decreased staff

• **Program predictability**
  – Having the right tool box

**NAVFAC SW has $589M in Navy/MC MILCONs for FY18.**
**Validated $781M of Rqmt for FY19**
Solutions

• Investment in People
  – Training

• Contract Tool Box
  – Relooking at geographic areas and how we can best serve our Public Works Officers
  – Adding additional regional tools
  – Potential for specialty IDIQ contracts
    • Multiple award AE IDIQ – won’t do
    • Non-appropriated Fund

• Pre & Post Award Contract Initiatives
  – Balanced mix of DB, DBB and AE or In-house
  – For DB contracts, adding a contract duration for the design effort as well as overall construction effort
  – Hot projects – visibility of issues
Opportunities

• Move of projects <$5M (not MCON) to the Public Works Offices

• Partnerships with the community

• AE IDIQ:
  – Multi-Disciplinary (MILCON Only, UR): proposals due 6/22
  – Civil (8a): proposals due 6/19 (UR): TBD

• MACCs:
  – 8a (So, Central, No): RFP issue for Southern July/Aug
  – Dry Utilities: RFP issue Oct
  – HVA/C: RFP issue Aug

NAVFAC SW portal has listings of upcoming projects & existing/proposed AE IDIQs and MACC
## Opportunities (FY18 MILCON Program)
