Design RFP Fall 2020
City-Wide Green Infrastructure Manual
RFP for Consultant Selection March 2020

• City does not currently have minimum volume reduction standards relating to the implantation of Green Infrastructure (GI).

• The City will be soliciting proposals to create a Green Infrastructure Manual beginning 2020.

• Information will be tailored specifically for our regions unique geology, geomorphology, and climate.
City-Wide Green Infrastructure Manual
RFP for Consultant Selection March 2020

• The manual will contain guidance for the planning and implementation of GI technics and facilities.

• Implementation requires an in-depth public process.

• Engineering details and specifications will also be prepared to aid in implementation.

• A vote of City Council is required in order to implement final minimum standards.
