What is the most effective and efficient way to manage common, day-to-day, installation support/base operating support (BOS) and expeditionary support activities?
General Hap Arnold, in preparing the after action report for World War II, highlighted the centrality of logistics and combat support for Air Force operations.

He wrote, “Modern war is a war for air bases, the bulldozer must accompany the plane,” and of course the fuel truck and warehouse and the ships and all the specifics that go with supporting a forward deployed air force.

“Air bases are a determining factor in the success of air operations. The two-legged stool of men and planes would topple over without this equally important third leg.” General of the Air Force Henry H. “Hap” Arnold
