

Memorandum of Agreement
between
Society of American Military Engineers
and
Vets2PM

The terms and conditions outlined in this Memorandum of Agreement will guide the Society of American Military Engineers (SAME) and Vets2PM, LLC (inclusive of Vet Stone, LLC). Its execution recognizes the intent of the two associations to form a strategic alliance to promote and provide education and credentialing services to active duty and veterans in Project Management and to provide job placement in support of our national security and infrastructure.

SAME will:

- Announce the partnership in SAME's RealTiME e-newsletter and on the SAME website.
- Promote Vets2PM services to SAME members via the website, and when appropriate, annual events.
- Provide complimentary booth and/or registration opportunities at our Joint Engineer Training Conference (JETC) to Vets2PM in order to promote credentialing to our membership.
- Provide a place for Vets2PM on the established SAME Credentialing Committee to continue collaboration on joint credentialing initiatives with the armed services and other strategic partners.

Vets2PM will:

- List appropriate SAME events on the Vets2PM website.
- Provide expert project management credentialing advice to SAME via abstract submission, articles for The Military Engineer (TME) magazine, and the Credentialing Committee.
- Collaborate with SAME on efforts to fill the talent shortage in the industry.

Term of Memorandum of Agreement. SAME and Vets2PM both agree that this agreement shall continue until either party, with 90 days written notice, elects to end the agreement. SAME and Vets2PM both agree to connect annually to review the agreement and to discuss future collaboration strategies.
