  12. High Water Crossing Construction - \$500K
  13. Low Water Crossing Restoration - \$300K
  14. Trail Repair & Area Grading - \$2M

# Beyond the Camp Ashland Rebuild Effort

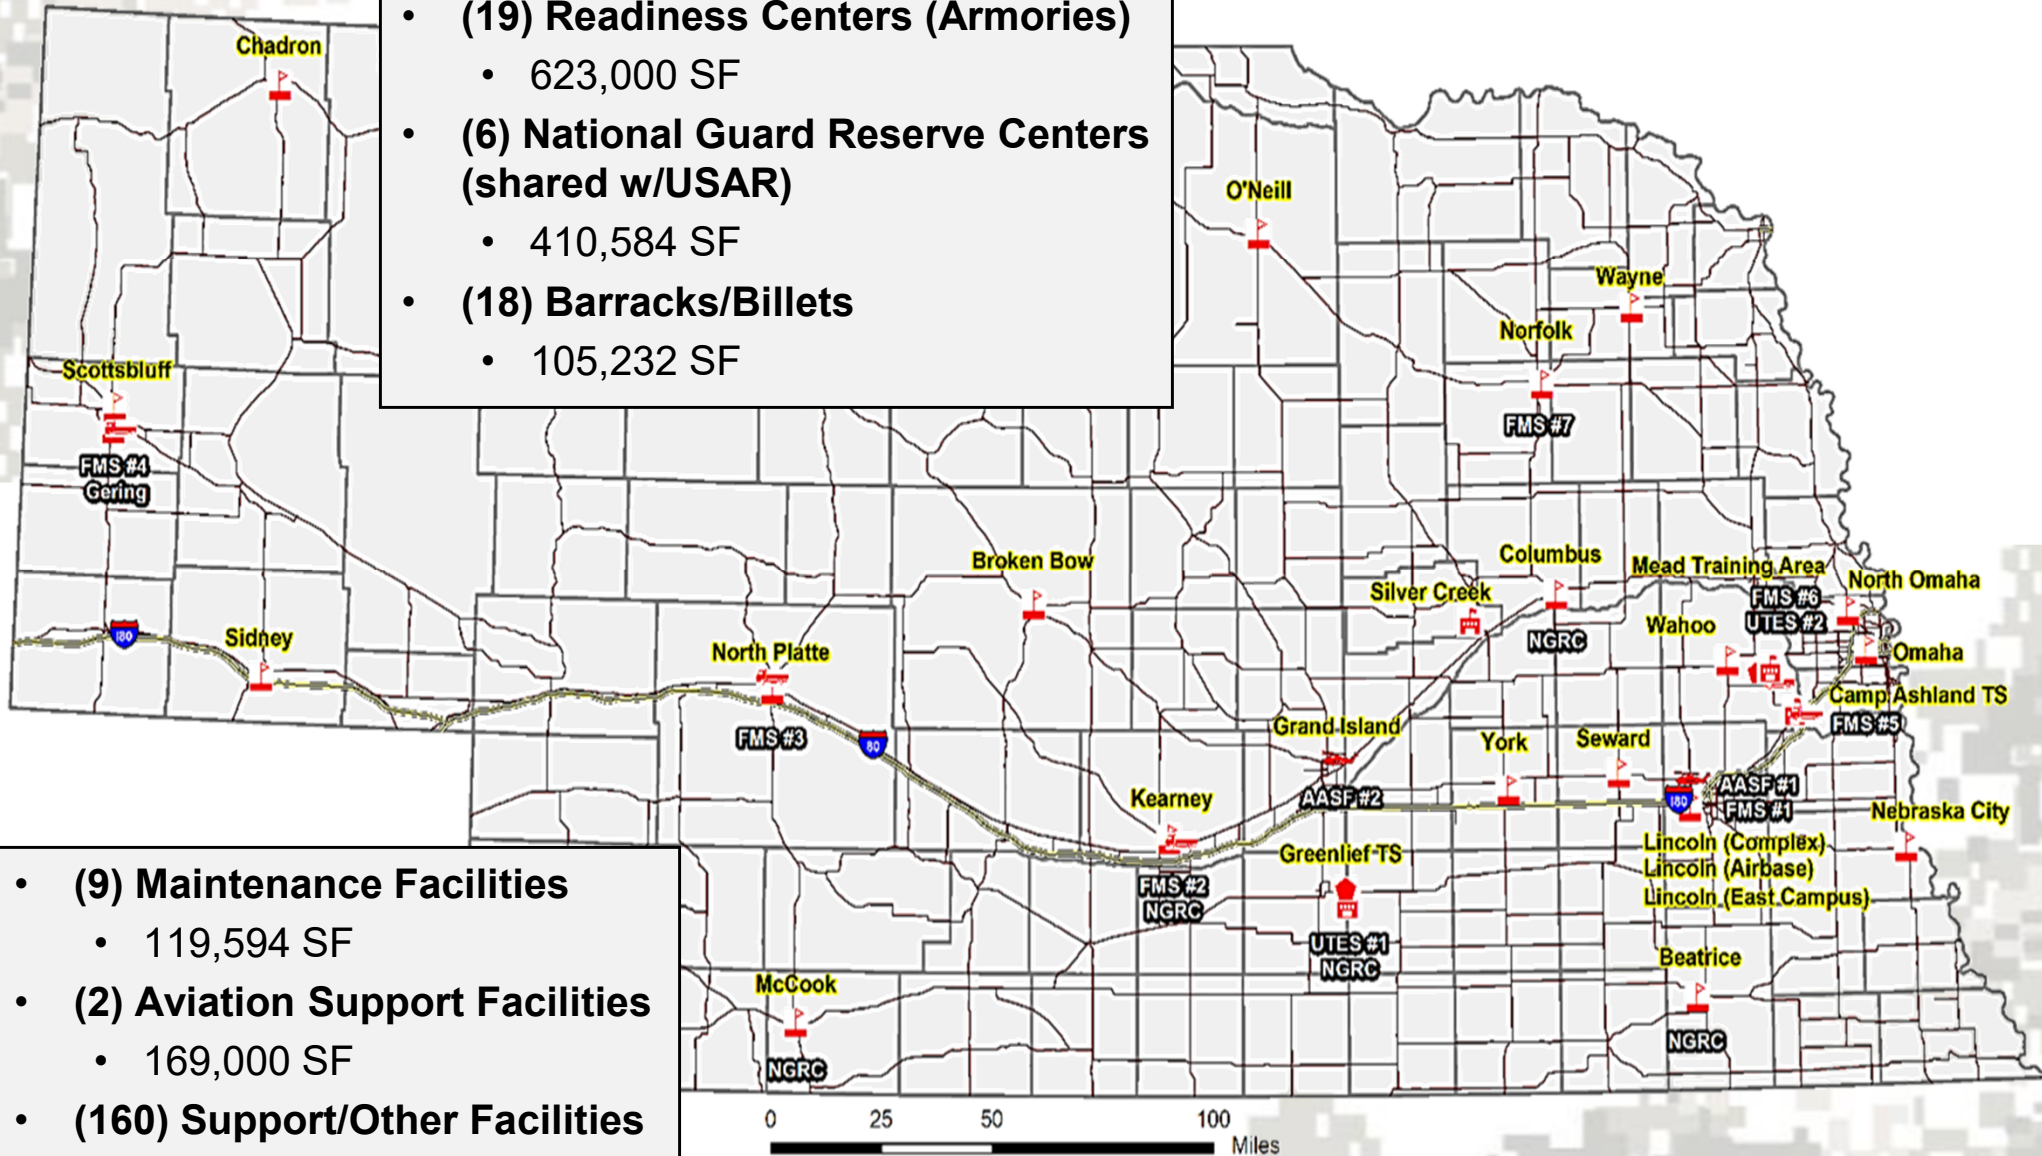

# Facility Overview

## Quick Facts

- **(19) Readiness Centers (Armories)**
  - 623,000 SF
- **(6) National Guard Reserve Centers (shared w/USAR)**
  - 410,584 SF
- **(18) Barracks/Billets**
  - 105,232 SF

- **(9) Maintenance Facilities**
  - 119,594 SF
- **(2) Aviation Support Facilities**
  - 169,000 SF
- **(160) Support/Other Facilities**
  - 122,554 SF

# Army National Guard Projects

- Bellevue Readiness Center: Re-Bid is currently on the street with bids to be received on June 23<sup>rd</sup>
- *Mead Training Area Barracks: 160 Bed Barracks Facility has the A/E Solicitation and Selection process in progress with an anticipated start to design in August 2022*
- (3) Bay Aviation Maintenance Hanger UMMC FY23-24 at Lincoln Air Base
- Greenlief Training Site (GTS) Barracks: Similar to the Mead Barracks, GTS will receive authorization for a 160 Bed Barracks
- Continued sustainment and modernization projects for facilities across the state

# Looking to the Future

# Energy Projects

- Continuous efforts to reduce operating costs, the NE National Guard is currently seeking avenues for Energy production and reduction of use
- As part of the Camp Ashland Rebuild effort, we are installing a Photovoltaic Field capable of producing 27% of the annual new buildings electric use
- Wind Power projects are limited due to our Aviation training needs and close-proximity to landing zones
- Current efforts have us analyzing the best approach to Electric Vehicle Charging Stations for both GOV and POV's at our locations across the state

# Energy Projects

We would like to hear about any new & innovative Energy related Products and Projects that you are seeing!
