YOUR ROLE
IN BUILDING
AMERICA'S
FUTURE.**

OUR MISSION ★ ★ ★ ★ ★ ★ ★ ★

“To lead collaborative efforts to identify and resolve national security infrastructure-related challenges.”

OUR 2020 VISION ★ ★ ★ ★ ★ ★ ★ ★

“To be recognized as the multi-disciplined integrator of military, public, private, and academic national infrastructure-related capabilities to produce viable solutions for America’s national security.”

GET CONNECTED

With more than 100 Posts across the United States and internationally, SAME enables members to get connected on the local level in order to build enduring relationships among military, industry, government and academic organizations, as well as with other professional societies. Posts are the foundation of SAME’s efforts to lead collaboration in support of the resilience of our nation.

STRENGTHEN YOUR COMMUNITY. JOIN SAME.

BECOME INVOLVED

SAME offers a broad range of opportunities to become involved nationally, including the Academy of Fellows, Engineering & Construction Camps, and our Committees & Councils. By bringing together practitioners from an array of technical fields, SAME Committees & Councils serve to advance the profession while helping develop the education and training roadmap for conferences, workshops, and webinars.

SHAPE THE NATIONAL DIALOGUE. JOIN SAME.

DISCOVER SAME...DISCOVER YOUR FUTURE

Founded in 1920, SAME is the premier professional association uniting public and private sector individuals and organizations from across the architecture, engineering, construction, technology, environmental and facility management, and contracting and acquisition disciplines in support of national security.

For almost 100 years, SAME members have been at the forefront of our nation’s greatest engineering achievements—the development of nuclear energy; construction of the national highway system and America’s unparalleled water infrastructure network; sanitation and public health advancements; the projection of air and sea power; space exploration; the digital age; and humanitarian support to nations in need. Today, SAME members continue to solve 21st Century challenges, including the war on terror, global stability, cyber security, energy and environmental sustainability, and resilience against the effects of natural and man-made disasters.

SAME, as it approaches its 100th anniversary in 2020, has grown alongside its members. The organization now offers extensive opportunities for training, education, and professional growth through conferences, workshops, networking events, strategic partnerships, webinars, technical publications, and leadership development. SAME’s 30,000 members come from around the world and represent uniformed and civilian professionals from state, local and federal government agencies, nonprofit associations, academic institutions, and private sector firms—all working to guide the future of the A/E/C profession and its contributions to the security of our nation.

GROW PROFESSIONALLY

SAME is committed to supporting the technical and leadership development of our members to sustain the future of the profession. From events to webinars to mentoring programs, SAME offers numerous ways to grow professionally—whether you are in uniform or a civilian, enlisted or officer, a new hire, mid-career manager, or senior executive. And through the SAME Foundation, we are positioned to help grow the next generation of military, government, and A/E/C industry leaders by creating opportunities that inspire youth to pursue a STEM career and investing in their growth.

FURTHER YOUR POTENTIAL. JOIN SAME.

STAY INFORMED

Through *The Military Engineer* magazine, market research reports, websites, and a vibrant collection of digital and social media platforms, SAME members stay informed of all that is happening across the A/E/C industry and the joint engineering community. We document lessons learned, share best practices, and follow the trends that matter to you, so that you can stay current in your career.

ENHANCE YOUR AWARENESS. JOIN SAME.

OUR ENDURING PURPOSE

“We are establishing at this time a Society of American Military Engineers. This society will serve no selfish purpose. It is dedicated to patriotism and national security. Its objects are, in brief, to promote solidarity and co-operation between engineers in civil and military life, to disseminate technical knowledge bearing upon progress in the art of war and the application of engineering science thereto, and to preserve and maintain the best standards and traditions of the profession, all in the interests of patriotism and national security.”

—*The Military Engineer* magazine, January 1920

With these words, published just 13 months after the end of World War I, SAME was formed. While the Society has grown and evolved over the last century, its purpose has not changed. SAME is the premier professional association working to bring together the public and private sectors to build connections, share lessons learned, and develop solutions that strengthen national security and enhance the engineering potential of the United States.
