Background

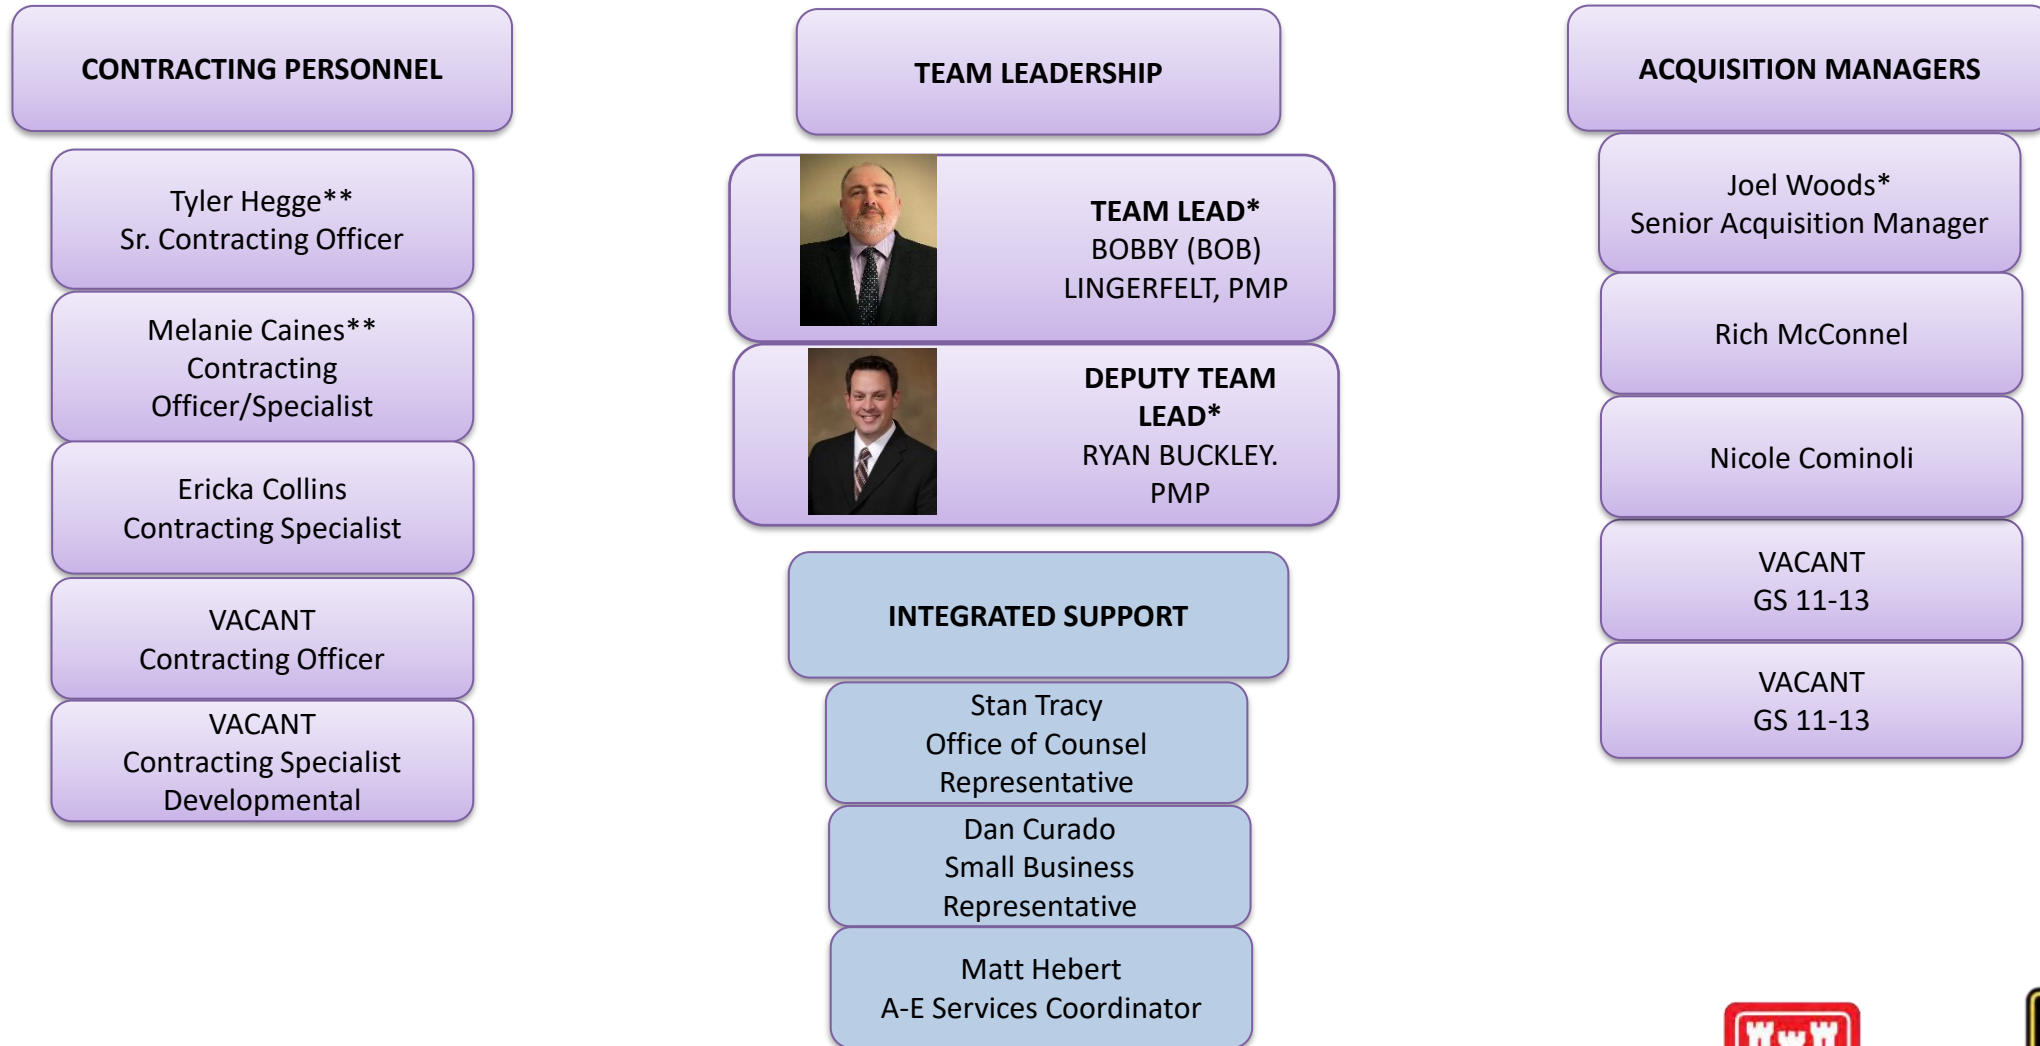

- The Acquisition Support Team (AST) was established in April 2015 and is tasked with enhanced acquisition and overall management of contract instruments essential for the District mission execution. The team is primarily responsible for the development and award of IDIQs which are high dollar, complex, or mission critical. Upon award, the contracts are transferred to Contracting.
- The AST is also responsible for receiving, vetting, and coordinating IDIQ requests; advising branch PMs on development of new contract vehicles; establishment of innovative techniques to expedite acquisitions; maintaining the EDW database; annual coordination for SAME Industry Day; support of CT, as necessary.
- The team is cross-matrixed
- The AST awarded \$1.36B in contract capacity in 2021.

Announcements

Flood Fight Contracts

During the recovery stages of the 2019 Nebraska, Iowa and Missouri floods, the U.S. Army Corps of Engineers is going to be awarding approximately 36 contract actions. Of those, 6 actions have been determined not to be appropriate for a Small Business set-aside either based on complexity, bonding limits or a combination of both. Thus these actions will be awarded as Task Orders using our RDI (Rapid Disaster Infrastructure) contract (S). The remaining 30 or so contracts will be issued using processes in accordance with the Stafford Act.
