Office Locations

With 550 offices worldwide,
we can quickly respond to
our clients' needs.

Who we are

We provide architecture and engineering services to U.S. federal agencies, foreign governments, and commercial clients worldwide. We assist international development and military clients with planning and designing new and rehabilitated buildings and infrastructure essential to achieving development goals, promoting global security, and supporting post-conflict and post-disaster reconstruction.

Projects include:

- Schools
- Health clinics
- Courthouses
- Government buildings
- Military housing
- Consulates
- Command and control facilities
- Radar stations
- Airfields
- Power generation and transmission facilities
- Water and sanitation systems
- Highways and bridges

Core International Government Markets

Defense

Services include **facility design for defense operations, infrastructure upgrades, specialized construction management, and compliance with military standards.**

Projects are customized to meet the unique demands of defense environments, integrating resilient structures, secure systems, and logistical support to enhance operational capabilities and readiness.

International Development

Services include **infrastructure planning, capacity building, economic development initiatives, and post-conflict reconstruction**, all tailored to meet the specific needs of diverse regions.

With an emphasis on locally driven solutions, each project is designed to strengthen communities, promote stability, and create lasting positive impacts in complex international settings.
