FEDERAL AI SUMMIT

AI for Architecture, Engineering
& Construction (A/E/C)

September 10, 2026

Stanford University

Presented by:

Artificial intelligence is transforming how we design, build, and maintain critical infrastructure. As AI capabilities accelerate, the architecture, engineering, and construction industry must work together to ensure these technologies are implemented effectively, securely, and in service of national priorities.

The **Federal AI Summit** is the first event of its kind, bringing together government agencies, industry leaders, innovators, investors, and academic institutions to advance the responsible adoption of AI in the built environment for federal infrastructure.

Event Format:

- **Full Day Summit** hosted at Stanford University
 - **Sept 9:** Welcome reception and networking (evening)
 - **Sept 10:** Full-day program featuring keynotes, panels, evening reception and networking opportunities
- Developed in collaboration with the Stanford School of Engineering Center for Integrated Facility Engineering (CIFE)

SUMMIT OUTCOMES

This summit will deliver actionable insights and foster collaboration across five critical areas:

1. **Empowering A/E/C Adoption** – Enable the A/E/C industry to actively pursue AI within a cybersecure federal framework
2. **Implementation Pathways** – Identify practical approaches to integrate AI throughout the lifecycle of the built environment
3. **Policy & Governance** – Define guardrails for federal AI policy and explore international regulatory perspectives
4. **Big Tech Partnership** – Strengthen collaboration with technology providers supporting AI infrastructure for A/E/C applications
5. **Future Innovation** – Explore emerging AI trends with academia, venture capital, and technology pioneers

Who Will Attend

We expect **300+ attendees**, including:

- **Federal Agency Leaders** overseeing infrastructure and defense projects
- **Military Engineers** from all service branches
- **A/E/C Executives and Practitioners** from leading architecture, engineering, and construction firms
- **Technology Innovators** developing AI solutions for the built environment
- **Venture Capital** investors funding the future of AI
- **Academic Researchers** advancing AI applications in infrastructure
- **Policy Makers** shaping policies for AI adoption

Why Sponsor

Sponsors are essential partners in making this summit possible. Your support enables us to deliver a world-class event while positioning your organization in front of the decision-makers shaping the future of AI in federal infrastructure and national security.

Sponsorship benefits include:

- **Visibility** among senior federal, military, and industry leaders
- **Thought Leadership** opportunities through speaking and content
- **Networking Access** to key stakeholders in intimate, high-value settings
- **Brand Alignment** with innovation, national security, and responsible AI adoption

SPONSORSHIP TIERS

Transformation Sponsorship Package

The highest level of partnership, including premium branding across all touchpoints, main stage speaking opportunity, full attendee access, dedicated marketing exposure, and exclusive branded elements.

Optimization Sponsorship Package

Premier-level sponsorship with prominent logo placement, stage spotlight opportunity, comprehensive attendee list access, and dedicated marketing campaigns to maximize your brand visibility.

Integration Sponsorship Package

Mid-tier sponsorship offering strong brand presence across event materials, full attendee networking access, social media promotion, and valuable conference participation benefits.

Adoption Sponsorship Package

Entry-level partnership providing essential brand exposure through website and event materials, attendee access, marketing mentions, and complimentary conference admission.

SPONSORSHIP TIERS: WHAT'S INCLUDED

We have created exclusive sponsorship packages with limited availability to ensure meaningful impact for our partners.

	Transformation	Optimization	Integration	Adoption
Investment	\$15,000	\$10,000	\$7,500	\$5,000
Availability	1	3	5	10
Company named on main stage	Included	Included	Included	Included
Logo on website	Featured (large)	Featured (large)	Standard	Standard
Logo on sponsor wall	Featured	Large	Medium	Small
Logo on registration app	Included	Included	Included	Included
Logo on additional	Multiple	Multiple	—	—
Swag bag - include gift item	Included	Included	Included	Included
Branded element	Cocktail napkins + 1 other	—	—	—
Main Stage spotlight opportunity	3 min commercial on stage (with speaker)	1.5 min commercial on stage (video format)	—	—
Attendee list (opt-in)	Full access	Full access	Full access	—
Social media mentions	5 posts	5 posts	3 posts	1 post
Email blast	1 dedicated	1 dedicated	Shared	Shared
Sponsor passes	5 complimentary	3 complimentary	2 complimentary	1 complimentary

ABOUT THE HOSTS

Founded in 1920, **SAME's** mission, to lead collaboration in support of national security priorities, is advanced through three interrelated strategic goals: Drive Partnerships, Deliver Solutions, and Develop People. With a National Office in Alexandria, Va., and over 100 local Posts and Field Chapters around the world, the Society unites military, public, private and academic sector individuals and organizations from the architecture, engineering, construction, environmental and facility management, cyber security, and contracting disciplines.

Through the SAME Foundation, the organization also is helping inspire and invest in the next generation of STEM professionals and leaders for the nation.

Learn more at www.same.org

Stanford CIFE - Center for Integrated Facility Engineering

CIFE aims to create knowledge that improves the performance of the built environment. **CIFE's** specific research focus is on the integration of design, construction, and operation for all kinds of built facilities. The knowledge created in the **CIFE** community is shared publicly to maximize its dissemination and speed up its widespread adoption. Since the data and knowledge about the performance of the built environment exist only in industry practice and cannot be simulated or collected in university laboratory settings, the interactions between **CIFE** and its industry affiliates are designed to maximize the likelihood of creating theoretically sound and practically relevant knowledge as efficiently as possible. Learn more at <https://cife.stanford.edu/>.
