

CMVP®

CERTIFIED MEASUREMENT & VERIFICATION PROFESSIONAL

INDUSTRY - GOVERNMENT - MILITARY

REGIONAL ENERGY MANAGER (26-30 YRS): A certified CMVP® with 20+ years of experience, lead an entire organization's measurement and verification (M&V) and savings validation program.

INSTALLATION ENERGY MANAGER (21-25 YRS): As a certified CMVP with 10+ years of experience, oversee M&V for performance contracts and incentive projects across co-located facilities for an installation, city, or university.

M&V ENGINEER (16-20 YRS): Develop M&V plans and savings reports, establish baselines, and verify guaranteed savings on energy projects. Maintain your certification.

M&V ANALYST (11-15 YRS): With 10 years of verified M&V experience (or 1 year as a current CEM or CEA), you can complete an approved CMVP training program, CMVP Application, and CMVP Examination. If not eligible for the CMVP, you may take the CMVP In-Training (CMVP-IT) certification in the interim.

ENERGY DATA TECHNICIAN (5-10 YRS): Install and maintain meters, submeters, and data loggers; collect and trend utility and interval data. Continue working toward bachelor's or associate's degree.

FIELD SERVICE TECHNICIAN (0-4 YRS): Apprentice-level trades technician supporting facilities maintenance such as mechanical, electrical, or plumbing systems, and industrial control systems. Working toward a general or energy management associate's degree.
